

## Hiple Family Dentistry Policy for Unsupervised Hygiene Visit

In 2014, the state of Indiana passed a law that enables licensed dental hygienists to perform routine prophylaxis without the dentist being present under the following conditions:

- Patients must have been seen within the last seven months for a routine exam.
- Patients must be informed the dentist will not be present at their appointment.

By signing this form, I am authorizing HFD to complete my dental cleaning without Dr. Hiple present.
